

Business Broadband

Business class broadband with a choice of fast download and upload speeds to suit your business.

- Wide choice of business class xDSL connections based on next generation network connectivity
- Fully flexible and competitive charging methods
- Complete data package with IP addressing, routers or wires-only
- Proactive monitoring and correction of your connection

How it works

Our data services have been specifically designed to utilise the latest network connectivity, ensuring that we are in full control of how traffic is routed over the network. With this control and flexibility we are able to offer a complete portfolio of different upload and download speeds along with charging methods tailored for your company's broadband use.

We're able to provide a complete 'out of the box' solution with router fulfilment, microfilters, IP addressing and any core connections required such as physical telephone lines. If you already have equipment and wish to reuse this with our wires only service, we can assist in getting you up and running with the connection you require.

Take a closer look

We offer three types of charging models to suit your business:

Capped

For businesses with a low broadband use who are looking for a highly competitive monthly rental, our capped service allows up to 5GB of either download or upload, with a price per GB should you exceed this within a month.

Unmetered

Businesses with an average broadband use should choose our unlimited service, with a Fair Usage Policy of 50GB during each month.

Unlimited

For businesses with a high broadband use, such as those wishing to attach to web or mail servers, or who have high use services such as file transfer, we offer a true unlimited service with no Fair Usage Policy.

Once you have chosen your preferred charging model you can then choose from a wide portfolio of available data connections (see over).

Data services: Business Broadband

Charging models

Capped

Home worker

Day-to-day emailing
and web surfing

Up to 5GB/month
download or upload

Unmetered

Multiple users

Emailing and web
surfing up to
50GB/month

Fair usage policy

Unlimited

Businesses with high
broadband usage

Use of web or mail
servers, file transfers

No fair usage policy

Benefits

- Choose a Broadband service that is right for your business.
- Save money by reusing existing equipment and only using the bandwidth your business requires.
- Know your costs up front with our simple pricing structure.
- Use the same supplier for all your telephone and data requirements - your critical business connections will be in one place with an experienced business communications supplier.

Product	Downstream	Upstream	Traffic Priority	Unmetered	Capped	Unlimited
