

Outbound calls

It's easy to save on call costs - even if your fixed line is not provided by us.

- A reliable route for your calls
- Outbound call plans to suit your business and optimise your budget
- Hassle-free transfer of services
- Sophisticated fraud prevention tools
- Accurate management and billing information - easier admin and cost control

How it works

Our Outbound call services enable you to select Gamma Business Communications to carry your calls over our industry leading IP-ready network.

It's all automatic, so there is no need to dial a prefix or install specialist equipment.

You can benefit from a range of competitively-priced call plans to suit traffic profiles, with different call plans focussed on UK, mobile and business calls.

We also offer incentives to sign contracts with commitment periods or minimum call spends each month.

Our Outbound call services can be combined to include phone line rental and other related services so you just get one bill from one provider.

We also offer unique fraud protection tools to quickly alert you to any mis-use or abuse of your outbound call service.

Phone services and systems: Outbound calls

Take a closer look

By choosing Gamma Business Communications to route your outbound calls, you no longer need to pay the high call charges set by your existing provider. You can switch to us easily and your calls are routed automatically.

You can save money on your calls by choosing a call plan that better suits the needs of your business. We'll provide a dedicated named account manager to manage the transfer for you. You'll benefit from our network expertise and excellent customer service.

For larger organisations with complex existing contracts in place, we often start the relationship with outbound calls and lines and build the relationship from there over time. This allows you to test our service and value, without necessarily entering into a long-term contract with a new supplier.

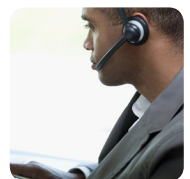

Although Outbound calls are similar from provider to provider, we have some unique features. Firstly, our calls are carbon neutral, whereby the power consumption is offset. Secondly, we can bill and analyse calls right down to individual DDIs on a per extension basis.

Finally, we have a number of sophisticated fraud protection tools in place that ensure, should your service be abused, that we can quickly identify abnormal calling patterns and let you know before you incur huge costs for international calling scams, for example.

In addition, call charges can be combined with other services we provide on a single bill to make management and admin easier for you. You may also like to take advantage of our simple online billing service.

Benefits

- No need to pay high call charges set by your current provider.
- Save money - choose a call plan to suit your business.
- Switch over to us with no hassle and your calls will be routed automatically.
- Excellent customer service – our named account manager arranges the transfer.
- Easier management – combine call charges with our other services on a single bill.
- Sophisticated fraud management tools ensure you are not a victim of expensive fraud.
- Carbon neutral calls to help your environmental policy.
